

The MD5 checksum of the TOP-SEC-VOL10.zip production that was provided in response to a Grand Jury subpoena was **4b420b572ded649cf1f28be61e7ca786**

Calculating MD5 checksum of the files produced in discovery yield a different MD5 checksum: **18c08b09021f4d0935094e0c314579f3**

The difference in the MD5 checksum indicates that some of the archive files were changed after receipt of the production.

Based on a review of the files in the archive, it seems that one spreadsheet was modified following its receipt.

## Info

**Protect Workbook**  
Control what types of changes people can make to this workbook.

**Check for Issues**  
Before publishing this file, be aware that it contains:

- Document properties, document server properties, content type information, printer path, author's name and absolute path
- Custom XML data
- Content that people with disabilities are unable to read

**Manage Workbook**  
Check in, check out, and recover unsaved changes.

- There are no unsaved changes.

**Browser View Options**  
Pick what users can see when this workbook is viewed on the Web.

**Properties**
